

Bastien Rigaud

Backend Developer

EXPERIENCE

Backend Developer

Kick.com (Easygo)

December 2023 - Present - Bordeaux (Remote)

I joined Kick as a backend developer to help on the migration to micro-services based architecture.

I helped to design and develop features that enabled the platform to handle more than 25 million users and 15,000 rps under normal traffic conditions.

- Owned and maintainer of the admin API
- Designed services to be able to handle high traffic volume
- Worked on the public API

Technologies : Golang - Kafka - Redis - MySQL

Fullstack Developer

Liberkeys

September 2022 - November 2023 - Bordeaux (Remote)

I contributed to the design, development and monitoring of SaaS products, helping to define them and implement innovative solutions. My role involved managing the entire product lifecycle, from design to production, ensuring quality throughout the process.

Technologies : Golang - Vue 3 - Postgres

Junior Software Engineer

Spendesk

September 2021 - July 2022 - Bordeaux (Remote)

During a one-year work-study placement at Spendesk, as part of the Banking team, I contributed to the development of APIs (generation of bank statements, etc).

Technologies : NodeJS - React - Postgres

EDUCATION

Master - Web Developer

ECV Bordeaux

2020 - 2022, Bordeaux
